directed energy and fleet defense The AN/SEQ-3 Laser Weapon System or XN-1 LaWS is a directed-energy weapon developed by the United States Navy. The weapon was installed on USS Ponce for field testing in 2014. In December 2014, the United States Navy reported that the LaWS system worked perfectly against low-end asymmetric threats, and that the commander of the Ponce is authorized to use the system as a defensive weapon.

directed energy and fleet defense Studies that quantify the life-cycle energy use and GHG emissions implications of AM components are currently scarce. Table 1 summarizes the existing literature, from which several observations can be made. First, most studies focus only on the direct energy intensity of AM processes without comparisons to the energy and material requirements of the CM processes that are replaced.
