dynamic theory of communication The broaden-and-build-theory is a model for explaining the mechanisms behind positive emotions in our minds and bodies. What are its effects? What is the evolutionary reason is behind these emotions? Studying emotions has always been a challenge, but it is important to understand and advance our ...

Broaden-and-Build Theory of Positive Emotions (+PDF)

dynamic theory of communication Models of communication are conceptual models used to explain the human communication process. The first major model for communication was developed in 1948 by Claude Elwood Shannon and published with an introduction by Warren Weaver for Bell Laboratories. Following the basic concept, communication is the process of sending and receiving messages or transferring information from one part ...

Models of communication - Wikipedia

dynamic theory of communication By giving full emphasis to the impossibility of not to communicate, the first axiom of communication stresses how communication is an event not subject to cessation. It is this never-ending characteristic that impels us to the need to ponder on
