(PDF) A Bibliography and Data Base on Environmental

economic valuation of wetlands a guide for policy makers and planners Introduction to Monetary Valuation. Economic valuation of ecosystem services can provide decision makers with evidence of the social benefits provided by, and tradeoffs among, regulatory alternatives and other ecosystem management or policy actions. Valuation implies a systematic quantification of benefits and costs realized by society in commensurable (typically monetary) units, using methods ...

Benefit Assessment: Monetary Valuation | National

economic valuation of wetlands a guide for policy makers and planners A wetland is a distinct ecosystem that is inundated by water, either permanently or seasonally, where oxygen-free processes prevail. The primary factor that distinguishes wetlands from other land forms or water bodies is the characteristic vegetation of aquatic plants, adapted to the unique hydric soil. Wetlands play a number of functions, including water purification, water storage, processing ...

Wetland - Wikipedia

economic valuation of wetlands a guide for policy makers and planners Ecosystem services are the conditions and processes through which natural ecosystems and the species that make them up, sustain and fulfil human life (Daily, 1997). The concept of ecosystem services encompasses the delivery, provision, production, protection or maintenance of a set of goods and services that people perceive to be important (). This includes goods such as seafood, forage, timber ...
